Promoting public health research, policy, practice, and education is the mission of the American Journal of Public Health. As we widen our scope to embrace global issues, we also sharpen our focus to support the needs of public health practitioners. We invite contributions of original unpublished research, opinion and commentary, departments, and letters to the editor.

The Journal is printed on acid-free recycled paper.

**Cover.** An elementary school student holds up a produce market voucher he received as a reward in class instead of candy. Students may redeem their vouchers at a stand in front of the entrance to Garfield Elementary School where affordable, largely organic produce is offered once a week during the academic year. Access to healthy, affordable food is a social justice priority.

## 30 Beyond the Poverty Line

BY ROURKE L. O'BRIEN & DAVID S. PEDULLA

The way the United States determines who is poor—a measure based solely on the cost of food—is broken. A new approach is needed, one that measures poverty through factors such as housing, transportation, and regional economic differences.

## 36 Freeing the Social Entrepreneur

BY CHANTAL LAURIE BELOW & KIMBERLY DASHER TRIPP

Social entrepreneurs are often reluctant to relinquish control and create strong leadership teams. Unless they make this transition, the organizations that entrepreneurs worked so hard to create are unlikely to scale up or have the desired impact.

## 42 Turning Values into Action

BY MARY C. GENTILE

Social innovators are usually motivated by their personal values, yet they don't always act on them for fear of conflict. To remedy this, they need to articulate their values consistently and act on them in a way that is likely to lead to good outcomes.

## 48 What Civil Society Needs

BY BRUCE SIEVERS

Headline-grabbing problems like global warming and extreme poverty garner most of philanthropy's money and energy, while less visible problems like the decline of the news media—one of the foundations of civil society—are often ignored. Yet without a healthy civil society, it is impossible to solve the other, more readily apparent problems.
